HUSK-E

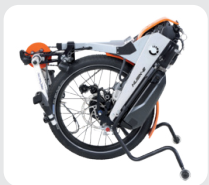

POWERFUL AND INCREDIBLY SMALL DURING TRANSPORT

The HUSK-E adaptive bike combines flexibility, performance and comfort in a compact design. The foldable bottom bracket support ensures a small pack size – ideal for transport. There are three versions to choose from: the **Shimano version** for intelligent performance with versatile gear-changing and control options as well as convenient automatic gear shifting; the **Bafang version** for maximum power and direct assistance from the very first turn of the cranks, with practical start-up assistance via a throttle grip; and the **manual version** for sporty personal propulsion. For older children and teenagers, the HUSK-E is available with a short bottom bracket support. A customised gear selection, ergonomic adjustment options and efficient brakes ensure optimum riding comfort and safety.

#PerformanceThatInspires

Powerful assistance up to 25 km/h. Whether flat or hilly: The drive system of the HUSK-E supports you up to 25 km/h. Cover longer distances effortlessly and enjoy the freedom of movement.

#CompactAndFlexible

The HUSK-E revolutionises the transport of handbikes: the fold-down bottom bracket support allows the adaptive bike to be quickly and easily reduced in size. Ideal for travelling and space-saving storage.

#EnduranceForEveryTour

Large battery capacity and dual battery option. With ranges of up to 100 km and the option of a double battery holder, even long tours are no problem.

#ThreeVariantsForEveryRequirement

HUSK-E is available as a Shimano (intelligent performance), Bafang (full power from the very first turn) or as a manual version – depending on your needs.

FLEXIBLY CONFIGURABLE FOR EVERY NEED.

The **HUSK-E** adapts to you – whether with electric assistance or as a manual bike without a motor. Various gears, brakes and ergonomic adjustments ensure maximum comfort. The fold-down bottom bracket support, practical kickstand and long reach make it suitable for touring and easy to transport.

UNIQUE, SELECTABLE OPTIONS FROM PRO ACTIV:

Reliable adaptation and easy handling. The HUSK-E is quickly attached to the wheelchair using the centre or front adapter. The practical parking stand also makes coupling and uncoupling easier.

Perfect ergonomics for maximum comfort. Individual grip widths and crank lengths as well as the adjustable bottom bracket support make the HUSK-E your ideal companion.

The manual version of the HUSK-E offers a sporty riding experience – without a motor. Ideal for anyone who wants to ride actively and improve their endurance.

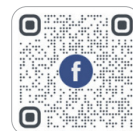

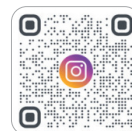

Luggage bags including holders are available as an option. The bags with a volume of 5.8 litres offer enough space for your shopping.
